Shalmalee Shenolikar

San Francisco, CA | 716-617-8068 | shalmaleeshenolikar@gmail.com | linkedin.com/in/shalmaleeshenolikar | github.com/shalmalee

Experience

Full-Stack Engineer Sep. 2024 – Present
Treatment Technologies & Insights *San Francisco, CA*

- Own Care Portal product and backend delivery for **10,000+ patients and clinicians**, shipping 20+ clinical and reporting releases.
- Design GraphQL APIs and PostgreSQL data models; built real-time pipelines processing **1M+ events**, cutting report generation time by **35%**.
- Engineered a patient-facing LLM chatbot on **AWS Bedrock**, grounding responses in authorized patient context and converting model output into structured clinical actions.
- Redesigned the React/TypeScript frontend architecture and component library, improving developer velocity **25%** across 5+ organizations and 20+ sites.

Software Engineer (Research Assistant) Sep. 2022 – Sep. 2024
University at Buffalo (X-Lab) *Buffalo, NY*

- Designed trial workflows and orchestration for a 0-to-1 clinical research platform, cutting configuration time **30%**.
- Developed React/Next.js frontends and Node.js APIs for clinical workflows; deployed services with **Docker, Kubernetes, and CI/CD**.

Software Engineer Intern May 2023 – Aug. 2023
Roche Molecular Systems *Santa Clara, CA*

- Integrated FHIR APIs into clinician workflows; optimized async fetching, caching, and code-splitting to cut load time from **5.8s to 1.4s**.
- Automated an AWS data pipeline for 300+ clinicians, streamlining data ingestion and transformation to cut manual effort **50%** and improve API performance **60%**.

Software Developer Oct. 2020 – Jul. 2022
Rocket Software *Pune, India*

- Designed REST APIs and service boundaries across **7+ Node.js microservices**, implementing contracts and resilient service-to-service communication.
- Engineered Kafka event-driven pipelines with Redis and MongoDB using idempotent consumers for high-volume async processing.
- Strengthened service resilience with timeouts, retries, circuit breakers, rate limiting, and observability across CI/CD pipelines, cutting production issues **90%**.

Skills

Languages: TypeScript, JavaScript, Python, Java, Go, SQL (PostgreSQL), PHP
Frontend: React, Next.js, React Native, TailwindCSS, Zustand, Redux, Jest
Backend & APIs: Node.js, REST APIs, GraphQL, Microservices, Kafka, Redis, MongoDB, Elasticsearch
Cloud & DevOps: AWS, OCI, GitHub Actions, Docker, Kubernetes, CI/CD, Observability
AI / LLM: AWS Bedrock, LLM Integration, Prompt Engineering, Retrieval-Augmented Generation (RAG)
Healthcare & Compliance: FHIR, HL7, EHR/EMR Integration, HIPAA-Compliant Systems, Clinical Data Pipelines

Projects

Low Code Application Builder | *Java, React, Redux, Node.js, Docker* Sep. 2019 – Aug. 2020

- Built a drag-and-drop WYSIWYG platform with reusable APIs and dynamic configuration, cutting development cycles **58%**.

Pharma Supply Chain | *Solidity, React.js, Node.js, Git* Jan. 2023 – May 2023

- Built a blockchain supply-chain tracking system, improving transparency **40%** and reducing counterfeit risk **15%**.

Education

University at Buffalo, SUNY Buffalo, NY
Master of Science, Computer Science *Aug. 2022 – Jan. 2024*

Pune University Pune, India
Bachelor of Technology, Computer Science *Aug. 2016 – May 2020*
