EDUCATION

University at Buffalo, SUNY

Master of Science, Computer Science

Buffalo, NY

Aug. 2022 – Jan 2024

Pune University

Bachelor of Technology, Computer Science

Pune, India

Aug. 2016 – May 2020

EXPERIENCE

Full-Stack Engineer (Frontend)

Treatment Technologies & Insights

September 2024 – Present

San Francisco, CA

- Owned delivery of an **AI-enabled Care Portal** used by **10,000+ patients and clinicians**, shipping **20+ features** and improving workflows and reporting speed by **35%**.
- Led **frontend architecture redesign** (React, TypeScript, GraphQL) boosting developer velocity by **25%**.
- Built **real-time dashboards** processing **1000000+ events**, improving high-risk patient identification.
- Led adoption of **WCAG 2.1 AA accessibility standards**, increasing engagement by **40%+**.
- Architected a **reusable components system** (Tailwind, Storybook) used across **5+ organizations**.
- Mentored engineers and conducted **1000+ code reviews**, raising code quality and engineering standards.

Software Engineer (Research Assistant)

University at Buffalo (X-Lab)

Sep. 2022 – Sept 2024

Buffalo, NY

- Designed & built a **clinical trial management platform**, reducing setup time by **30%**, improving workflows.
- Developed cross-platform applications using **React Native, Next.js, Node.js** for responsive user experiences.
- Deployed and managed containerized services (**Docker, Kubernetes, CI/CD**), improving reliability by **25%**.
- Mentored peers on **debugging, architecture, and best practices**, reducing onboarding time by **20%**.

Software Engineer Intern

Roche Molecular Systems

May 2023 – Aug 2023

Santa Clara, CA

- Built high-performance clinician UIs using **React, TypeScript, FHIR APIs**, improving performance by **60%**.
- Reduced load time from **5.8s to 1.4s** using **code-splitting, lazy loading, and caching strategies**.
- Developed an **AWS-based data pipeline** for **300+ clinicians**, reducing manual workflows by **50%**.

Software Developer

Rocket Software

Oct 2020 – July 2022

Pune, India

- Delivered **data-intensive SaaS UI** using React, Redux, and Material UI, improving user workflows by **40%**.
- Designed and implemented **REST APIs** powering **7+ microservices** using Node.js, Kafka, Redis, MongoDB
- Improved system reliability by implementing **automated testing (Jest)**, reducing production issues by **90%**.
- Contributed to **system design decisions**, authored **50+ technical documents** to improve onboarding by **30%**

PROJECTS

Low Code Application Builder | Java, React, Redux, NodeJS, Docker

Sept 2019 – Aug 2020

- Designed a **drag-and-drop WYSIWYG application builder** using React, Redux, and Node.js, reducing development cycles by **58%** through reusable UI components and dynamic configuration.

Pharma Supply Chain | Solidity, React.js, Node.js, Git

Jan 2023 – May 2023

- Built a **blockchain-based supply chain system** using Solidity and React, improving tracking transparency by **40%** and reducing counterfeit risk by **15%**.

TECHNICAL SKILLS

Languages: Javascript, Typescript, PHP, SQL (Postgres), HTML/CSS, Java, Python

Frameworks: React, Node.js, Next.js, Laravel, Livewire, TailwindCSS, REST APIs, GraphQL, MongoDB, Redis, Kafka, Elasticsearch

Developer Tools: Git, Docker, Figma, AWS, VS Code, JIRA, PyCharm, IntelliJ, Eclipse

Libraries: Zustand, Redux, ES6+, Jest, Mocha, Selenium, Webpack, Babel, Vite, Parcel, NPM, Yarn
